

CONFIDENTIAL

15 May 1981

MEMORANDUM FOR: Executive Officer, ODP

FROM : [REDACTED]  
Chief, Europe Division, OCR

SUBJECT : ADP Briefings [REDACTED]

REFERENCE : Your Memorandum, ODP 81-617, dated  
12 May 1981

1. The portion of the NFAC briefings conducted by the Information Services Group, OCR, included a general discussion of OCR's role as a central reference point for information and document retrieval in support of intelligence analysis, and a discussion of the AEGIS/RECON bibliographic retrieval system. [REDACTED]

2. Messrs. [REDACTED] were interested in virtually all aspects of the indexing system: how we are organized, how documents are received, qualifications of document and country reference analysts, who identifies topics to be indexed, the indexing code structure, coding of security controls, etc. Because the OCR segment of the briefings began much later than expected, and because many questions were asked by the [REDACTED] representatives, we were forced to drop the scheduled OCR sessions on directory production, the Rapid Search Machine and ADSTAR. We did maintain the scheduled briefing time for Project SAFE. OCR/SAS will send you a note on that session. [REDACTED]
